Subject: Letter of Recommendation for Bill Maintz

To Whom It May Concern:

Bill worked as part of my extended team as a senior technical integration consultant for a large systems integration project. Bill joined our team in August 2004 through June 2004. His responsibilities included systems integration, standards development and deployment, and overall systems support for a large complex hosted solution spanning multiple platforms and applications including AIX, Win2K, Oracle, Sybase, Facets, Business Objects and Vitria.

During the course of his assignment, Bill demonstrated his skills and experience by his timely delivery, thought leadership, hard work, and talented technical skills.

I was quite impressed by Bill's ability to complete all the work assigned to him on time and in a quality fashion. His commitment to the success of the project was clearly demonstrated by his hard work and dedication. His seasoned technical skills and leadership is what our project needed and Bill was a key factor in our success.

Overall, Bill is a very conscientious, talented, and seasoned technology consultant. I certainly will not hesitate to call him and request that he joins my team on any future projects or endeavors.

Sincerely,

Albert Ghafari
